Polimor maniglie metallo, belle da vedere e da toccare

Polimor metal handles,
nice to be looked
and to be touched

Evoluzione del prodotto e del design

I prodotti Polimor sono in evoluzione costante, essendo la loro ideazione strettamente collegata ai mutamenti estetici e tecnologici degli ambienti d'arredamento ed al cambiamento del modo di vivere moderno.

La ricerca diventa un obiettivo fondamentale, che coinvolge l'aspetto formale, materico e cromatico; nascono, così, prodotti ben equilibrati, che, rispettando gli standard qualitativi, fanno tendenza.

La linea di maniglie in metallo nasce da un processo stilistico indirizzato ad una fascia di mercato più esigente e presenta una collezione che si sviluppa anno dopo anno con uno stile unico, sempre rivolto alla meticolosa cura dei dettagli.

Vengono, così, realizzati prodotti che si abbinano armoniosamente ai mobili che li accolgono, risultando oggetti belli da vedere e piacevoli da toccare.

Design and products in tendency

Polimor products are in constant development, being their creation strictly related to the aesthetical and technological changes of furniture context and to the modern way of living.

As a result, the Research becomes a basic goal, that involves formal, Material and chromatic aspect; following such guide-lines is the right way for the creation of well-balanced items, that, in compliance with the quality standards, forge a new trend. The assortment of metal handles has its origin in a stylistic process, addressed to a high-demanding market range and offers a collection, that evolve year by year with a unique style, always narrowly taking care of the details.

Therefore, the products are perfectly tuned in with the furniture, appearing objects really tactful and nice to be looked.

Polimor lo stile italiano in tutto il mondo.

Polimor, the Italian
style in the world.

Lo stile italiano è la prerogativa fondamentale per la Divisione Metallo Polimor. La nostra ricerca non si ferma mai. I progetti Polimor danno origine a maniglie di metallo uniche. In tal modo, le forme semplici e minimali si alternano con i volumi più sinuosi e articolati, consentendo un'ampia scelta di applicazione nei distinti mobili d'arredo. Con i migliori stili scelti per voi dal nostro team, le nostre maniglie in metallo sono il frutto di importanti sinergie aziendali, che coniugano eccellenza e creatività. Le finiture sono sia standardizzate per le grandi quantità che personalizzate.

Con le nostre maniglie in metallo esportiamo lo stile italiano in tutto il mondo.

Italian style is the main feature of Polimor production. Our research for the best never stops. Polimor projects give birth to elegant and rich metal handles, with not only minimal designs, but also sinuous and playful styles. As a matter of fact our products are the result of a strong partnership among all divisions of our company. The technical department is only one of the main actors involved in the process. Creativity is added by each one of us. Finishes can be standard or personalized according to the client expectations and desires.

With our metal handles we export Italian style all over the world.

Certifica la qualità, anticipa il futuro!

**Certify the quality,
advance the future!**

POLIMOR & PRODUZIONE

A garanzia del costante impegno profuso per il raggiungimento degli obiettivi di qualità e nella ricerca della reciproca soddisfazione nei rapporti con clienti e fornitori, POLIMOR s.r.l. ha ottenuto la certificazione UNI EN ISO 9001:2008 rilasciata dall'ente certificatore TÜV.

POLIMOR & AMBIENTE

La difesa dell'ambiente è oggi un argomento di vitale importanza. La normativa internazionale UNI EN ISO 14001 è il più diffuso strumento volontario di gestione ambientale destinato alla prevenzione e riduzione dell'impatto ambientale derivante dalle attività aziendali. POLIMOR s.r.l., con l'ottenimento della

certificazione UNI EN ISO 14001:2004 rilasciata da TÜV, conferma la propria filosofia aziendale, garantendo rispetto per l'ambiente ed eco-sostenibilità, attraverso un controllo delle cause e degli effetti ambientali correlate alle proprie attività produttive.

POLIMOR & SICUREZZA IN AMBIENTE DI LAVORO

La certificazione ISO 45001-2018 (Occupational Health and Safety Assessment Series) attesta l'applicazione volontaria, all'interno di un'organizzazione, di un sistema che permette di garantire un adeguato controllo riguardo alla Sicurezza e la Salute dei Lavoratori, oltre al rispetto

delle norme cogenti.

Attraverso questa certificazione, rilasciata da TÜV, POLIMOR può:

- 1) garantire il rispetto della norma alla salute dei lavoratori e di conseguenza accrescere i livelli di sicurezza;
- 2) garantire un approccio sistemico e preordinato alle emergenze derivate da infortuni ed incidenti;
- 3) migliorare l'immagine aziendale verso il cliente esterno e gli stakeholders garantendo maggior affidabilità nella gestione dei rischi relativi alla salute e sicurezza dei lavoratori, secondo un modello organizzativo riconosciuto a livello internazionale.

POLIMOR AND PRODUCTION

Polimor has obtained the UNI EN ISO 9001:2008 certification, issued by TÜV corporation, as a warranty of constant commitment to achieve the quality targets and in search of mutual satisfaction with customers and suppliers

POLIMOR AND THE ENVIRONMENT

The protection of the environment is today an issue of crucial importance. The UNI EN ISO 14001 international regulation is the most widespread and intentional instrument of environment management used for the prevention and reduction of environmental impact coming from companies. Polimor, with the achievement of the UNI

EN ISO 14001:2004 certification, issued by TÜV confirms its own company philosophy, granting respect for the environment and eco-sustainability, through a control of the environmental cause and effect related to its own productive activities.

POLIMOR AND SAFETY IN WORKING ENVIRONMENT

The ISO 45001-2018 certification (occupational Health and Safety Assessment Series) certifies the voluntary application of a method allowing to grant an adequate control in terms of the workers' safety and health, besides the respect of compulsory regulations.

Through this certification issued by TÜV, Polimor can:

- 1) Guarantee the respect for the regulation of workers' health and consequently increase the safety levels
- 2) Guarantee a systemic and prearranged approach to the emergencies coming from injuries and accidents
- 3) Improve the company image towards the customer and the stakeholders, granting a higher reliability in the management of risks, related to the workers' health and safety, according to an organizational model internationally acknowledged.

Polimor.it

SITO WEB POLIMOR;

nuova funzione stampa PDF.
Il sito web Polimor si arricchisce di una nuova funzionalità permettendo all'utente di stampare in autonomia le schede prodotto in formato PDF sia nel formato di SINGOLA SCHEDA che nel formato di CATALOGO PERSONALIZZATO.

Ci sono due funzioni disponibili per la stampa nel formato digitale PDF:
STAMPA SCHEDA SINGOLA
CREA IL TUO CATALOGO
Ovviamente tutti i documenti PDF generati e salvati potranno essere ulteriormente stampati se necessario in cartaceo. (NON SPRECCARE - Presta attenzione e riduci comunque il consumo della carta)

POLIMOR WEBSITE;

new PDF printing function.
The Polimor website is enriched with a new functionality allowing the user to independently print product sheets in PDF format both in the SINGLE CARD format and in the CUSTOMIZED CATALOG format.

There are two functions available for printing in the digital PDF format:
PRINT SINGLE CARD
CREATE YOUR CATALOG
Obviously all PDF documents generated and saved can be further printed if necessary in paper form. (DO NOT WASTE - Pay attention and reduce paper consumption anyway)

Le nostre divisioni

Our division

Polimor per rendere ai suoi cliente, più fruibile e chiara la proposta di prodotti, ha rivisto l'assetto aziendale in termini di organizzazione produttiva. Per questo motivo gli stessi strumenti di presentazione dei prodotti (vedi catalogo web sito online) sono stati riprogettati e presentati nelle TRE DIVISIONI AZIENDALI:

DIVISIONE METALLO
DIVISIONE PLASTICA
DIVISIONE BORDO A SPESSORE

To make the product offering more accessible and clear to its customers, Polimor has revised the company structure in terms of production organisation. For this reason, the same product presentation tools (see online website catalogue) have been redesigned and presented in the THREE COMPANY DIVISIONS:

METAL DIVISION
PLASTIC DIVISION
EDGEBANDING DIVISION

Legno / Wood
Laccato colorato / Colored painted
Platinato cromo / Mat chrome

Maniglie Profilo

Profile Handles

Lavorazioni Custom

Custom machining

Le maniglie prodotte con la tecnica di estrusione dell'alluminio, vedi la gamma di maniglie a listello o regolo e la gamma di maniglie denominate a "elle" applicate nel bordo dell'anta, dopo l'estrusione possono essere ulteriormente personalizzate. Ovviamente oltre ad essere molto flessibili nella definizione delle varie lunghezze e dei vari interassi.

The handles are produced using an aluminum extrusion technique, see the range of strip or straight handles and the range of "L" shaped handles applied on the edge of the door, which after extrusion can be further customized. Obviously, in addition to being very flexible in defining the various lengths and interaxes.

Qui potrete individuare alcuni esempi di lavorazioni effettuate.

Here you can find some examples of work carried out.

Maniglie "Elle" (Fissaggio retro anta)

L handles (Rear of the door fixing)

Lavorazione di taglio dritto o inclinato
Straight or inclined cutting process

Lavorazione sagomata anch'essa con possibili silhouette differenti
Shaped workmanship also with possible different silhouettes

Lavorazione con raggio finale di varie dimensioni
Processing with a radius of various dimensions

Maniglie "Regolo"

Maniglie "Regolo" (Fissaggio retro anta)

Straight handles (Rear of the door fixing)

Lavorazione con raggio finale di varie dimensioni
Processing with a radius of various dimensions

Lavorazione sagomata nella zona di presa della maniglia
Shaped workmanship in the grip area of the handle

Lavorazione della zona di presa con varie dimensioni
Processing of the grip area with various dimensions

Lavorazione con posizione variabile della zona di presa
Machining with variable position of the gripping area

Lavorazione di taglio inclinato nella parte terminale della maniglia
Inclined cutting process on the terminal part of the handle – possibly this could be replaced with angled cutting at the ends of the handle.
